

NON-CODING RNAs AS THERANOSTIC TARGETS FOR ORAL CANCER STEM CELLS AND ORAL SUBMUCOUS FIBROSIS

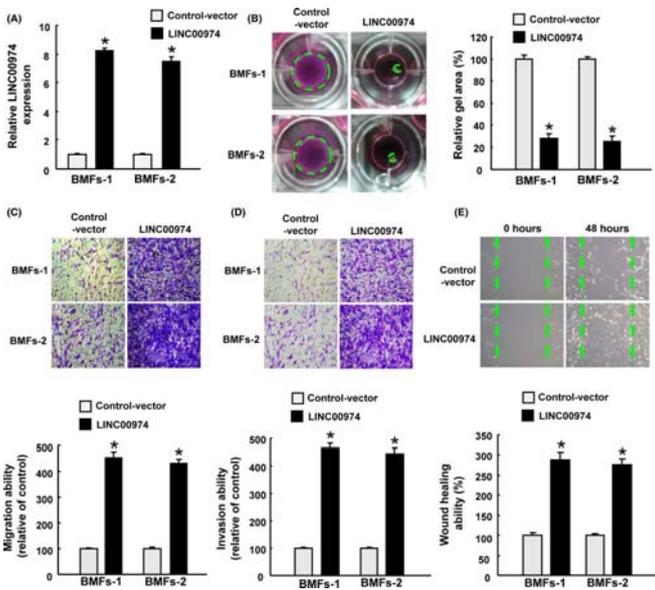

GUEST LECTURE by

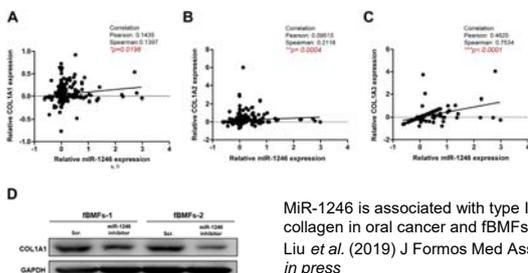

Prof. Dr. Cheng-Chia Yu
Institute of Oral Sciences, College of Oral Medicine,
Chung Shan Medical University, Taichung City,
Taiwan

Tuesday, 25.06.2019
16:00

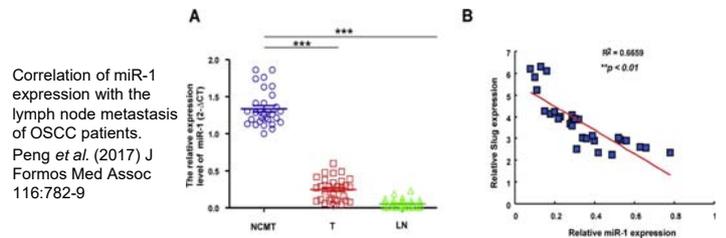

Lecture Hall HS E1, Lecture Hall Center
(Auenbruggerplatz 15), MUG

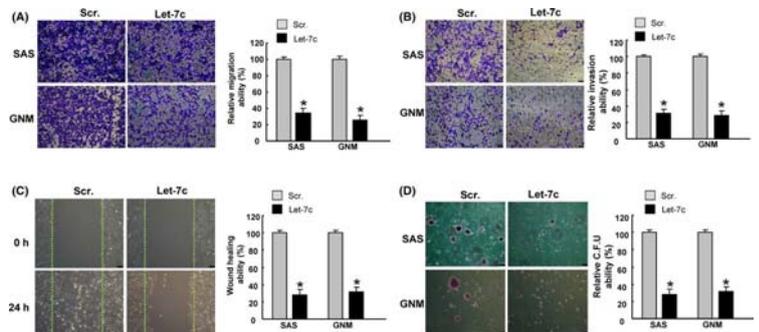

Overexpression of LINC00974 induces myfibroblast activities.
Fang *et al.* (2019) *J Oral Pathol Med* 48:151-8

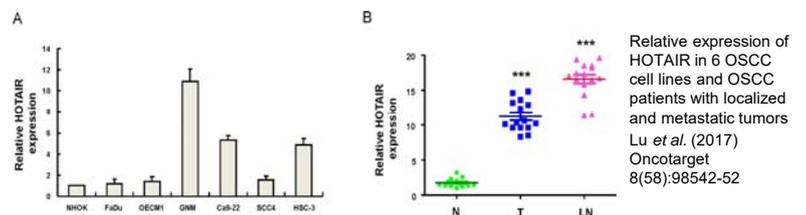

MiR-1246 is associated with type I collagen in oral cancer and fBMFs.
Liu *et al.* (2019) *J Formos Med Assoc* in press

Correlation of miR-1 expression with the lymph node metastasis of OSCC patients.
Peng *et al.* (2017) *J Formos Med Assoc* 116:782-9

Anti-metastasis in oral cancer stem cells (CSCs) by let-7c.
Peng *et al.* (2018) *J Oral Pathol Med* 47:590-7

Relative expression of HOTAIR in 6 OSCC cell lines and OSCC patients with localized and metastatic tumors
Lu *et al.* (2017) *Oncotarget* 8(58):98542-52
