Glucose control of beta cell function in pancreatic tissue slices

GUEST LECTURE by

Prof. Dr. Marjan Rupnik
Department of Physiology
Medical Faculty
University of Maribor, Slovenia

Wednesday, 28.11.2012
17:00h
Lecture Hall HS E2
Lecture Hall Centre, Auenbruggerplatz 15

Relation between insulin-positive cells and ducts in postnatal day 0 mice.

APMAR activation increases cytosolic Ca²⁺ and attenuates KATP channel conductance ▲

Immunohistochemistry confirming the identity of patched α-cells in pancreatic slices
