

Prof. Heinz Sill, Division of Hematology, cordially invites you to a

Guest Lecture by

Prof. Peter VALENT, M.D.
Medical University of Vienna

**(Pre-) Leukemic Stem Cells
in Myeloid Neoplasms**

July 31st, 2015, 3pm

Sitzungszimmer, Universitäts-Kinderklinik, 1. Stock

In myeloid leukemias, (pre-) leukemic stem cells play fundamental roles with regard to residual disease and establishment of therapeutic resistance. Prof. Valent and his group have recently identified novel, leukemia-specific markers on these cells that may be used for the development of targeted treatment approaches.
