

PhD Guest Lecture

Searching for patterns in chaos: how vascular patterning regulates tissue fibrosis

by Dr. Neil Dufton

Queen Mary University of London

Brief Biography:

Neil completed his PhD at Queen Mary in 2009, followed by post-doc positions at McMaster University in Canada and Imperial in London before starting his own group at QMUL in 2019 primarily focused on endothelial cell plasticity in fibrotic diseases. His work has been published in Nature comms, Circulation and Dev Cell and he has produced images in the National Geographic, Wellcome Collection and been shortlisted by BHF image awards.
