Rector of the Medical University of Graz
Hellmut Samonigg

Dear visitor,

WELCOME to the Medical University of Graz! We are pleased to be able to welcome you to our institution. We have put together an orientation package to give you a brief introduction to our university. This package contains a variety of information that may be helpful to you.

You are provided with details on the history of the Medical University, descriptions of the individual organizational units and information on the infrastructure.

With kind regards,
The Rector of the Medical University of Graz,

Univ.-Prof. Dr. med. univ. Hellmut Samonigg

1. The Medical University of Graz: A Young University with a Long Tradition

Archduke Karl II
(Source: Wikipedia)

The Medical University of Graz has been autonomous since 1 January 2004, which is why its history before this date is that of the University of Graz. This university was founded by the Habsburg Archduke Karl II of Inner Austria on 1 January 1585 and consisted of a theological and philosophical faculty. Incorporating a faculty of law and one of medicine was attempted several times, but it always failed due to financial difficulties on the part of the noblemen.

In the meantime, the university was re-established as a lyceum. However, the Styrian estates and the Town of Graz made a request in 1826 to elevate the school to a university once again and to make it complete by founding a faculty of medicine.

The need for a faculty of medicine was based on the extreme lack of physicians in the region. Surprisingly, the rector of the lyceum at that time, Ferdinand von Schöller, did not join in this request.

In 1833, a new organizational design was approved by the Emperor: starting in the 1839/40 academic year, the professors of surgical and medical schools were required to acquire a doctorate and a new building for anatomy was opened in 1843. The big obstacle of “financial difficulties” was overcome by generous donations from the province and town as well as the Steiermärkische Sparkasse (Styrian Savings Bank). On 31 August 1863, the Emperor appointed the new professors. Just as planned, the Faculty of Medicine was inaugurated on 14 and 15 November 1863.

On 1 January 2004, the Faculty of Medicine was separated from the University of Graz by the federal government and was established as an autonomous university.

2. The Medical University of Graz

2.1. The Tasks of the Medical University

Teaching and training according to high-quality standards, research on an international level and the continuous improvement of high-end medicine are among the central tasks of the Medical University of Graz. About 1,600 staff are permanently employed by the Medical University, and an additional 600 people work as part of projects, most of them for a fixed term.

On account of all these interests, the University is oriented towards the bio-psycho-social model. Physical, psychological (emotional) and social factors work together when it comes to good health, but also when it comes to illness. From today's perspective, these factors are very closely intertwined. This means that physical, psychological and social processes are always interrelated. Therefore, the Medical University of Graz focuses on the whole human being and not just the symptoms.

2.1.1 Studies and Teaching

The Medical University of Graz currently offers the following study programs and university training courses:

Study program:

- Diploma program in Human Medicine
- Diploma program in Dentistry
- Doctoral viva voce program in Medicine
- Doctoral program in Medical Sciences
- Bachelor's program in Health Management and Nursing Science
- PhD program
- Master's program in Health Management and Nursing Science

University Training Courses:

- Public Health
- Training Course for Medical Executives
- Public Health in Nursing
- Interdisciplinary Early Intervention & Family Support
- University Training Course for Physicians in Public Health Services
- University Training Course in Dermoscopy (e-learning program)
- Master's in Cardiorespiratory Physiotherapy
- Post-graduate Training Course in Prosthetics
- Clinical Investigators Training Course

Approximately 5,000 students per year register for the programs and university training courses mentioned above and there are about 350 graduates every year.

2.1.2 Research

The Center for Medical Research (ZMF) was founded in 2004. With its approximately 4,100 m² it is the largest single research area at the Medical University. Besides numerous special laboratories, scientific workshops, an audio-visual unit as well as a library featuring a study center and a wide range of literature round off the infrastructure of the ZMF.

The Research & Research Management organizational unit oversees about 200 national and international projects with partners from Austria and abroad, cooperations with industry and the business world as well as significant studies and publications.

Research database of the Medical University of Graz: "FODOK Research Portal"

The research database of the Medical University of Graz, also called "Research Portal", is a pool of the research work (publications, projects, scientific community activities etc.) of the University's researchers.

Link for the public:

<http://si027.medunigraz.at:7777/fodok/rio.suche.startseite>

2.1.3 Medicine and Patient Care

The LKH-Univ.-Klinikum Graz is the most important teaching hospital of the Medical University of Graz (next to the LKH Klagenfurt, the Privatklinik Althofen, the Geriatisches Gesundheitszentrum Graz, the Krankenhaus der Barmherzigen Brüder in St. Veit/Glan and Graz-Eggenberg, the LKH Villach and Krankenhaus der Elisabethinen in Graz). Both the education and training of the students and research of the Medical University of Graz mainly take place at the LKH-Univ.-Klinikum. The LKH-Univ.-Klinikum is run by the KAGes, the Styrian Hospitals Private Limited Company.

In the fields of high-end medicine and patient care, the Medical University works hand in hand with the KAGes. The Medical University supports patient care by the know-how of its staff and by financial means.

2.2. Organizational Structure of the Medical University of Graz

The Medical University currently consists of 20 university clinics (a total of 40 clinical departments), 16 institutes and 4 non-academic organizational units as well as 8 bodies. The top management bodies are the Rectorate, the University Council and the Senate.

2.2.1 The Rectorate

The Rectorate is the central management body and consists of the Rector and her/his Vice-Rectors. The term of the Rectorate is 4 years.

The Rector

The Rector is the chairperson of the Rectorate and the highest body of the University. She/he is the top supervisor of the entire university staff.

Tasks and Business Areas of the Rector

- Director of the University Authority
- Negotiation and conclusion of performance agreements with the responsible federal minister
- Performing her/his role as the highest superior of the entire university staff
- Chairperson and spokesperson of the Rectorate
- Making a proposal for the election of the Vice-Rectors
- Conclusion of employment contracts with the Vice-Rectors
- Selection from the list of proposals for appointment of university professors put forward by the Appointment Committee
- Conducting of appointment negotiations
- Conclusion of employment contracts and contracts for work and services
- Granting of authorities

E-mail: rektor@medunigraz.at

Vice-Rector of Research and International Affairs

Mag^a Caroline Schober-Trummler

The Vice-Rector of Research is responsible for research in general and for research management and research infrastructure in particular.

First and foremost, research management means actively supporting researchers in applying for and carrying out third-party funded projects (Austrian Science Fund - FWF, Austrian National Bank - OeNB, EU projects etc.). In addition, our researchers receive advice and assistance in exploiting their research results and technologies in the form of patents, licenses and the establishment of businesses.

What is also important is to cooperate with companies and most of all to establish and extend national and international research cooperations. We would like to offer the best and broadest possible support and thus relieve the researchers of administrative tasks.

Research has a lot to do with curiosity and creativity. By providing a researcher-friendly environment we can help our researchers to dedicate themselves to their actual task and passion, that is, research. Short-term as well as long-term strategies are developed and implemented in order to create the optimal research infrastructure for the present and the future, too.

A declared goal of this Vice-Rectorate is to contribute to the increase of research and in particular third-party activities as well as to stimulate and center the research landscape on “fields of strengths”. Researchers of the Medical University are encouraged and rewarded for their scientific activities by means of performance-oriented allocation of funds.

Vice-Rector of Teaching and Studies

**Univ.-Prof. in Dr. in
Doris Lang-Loidolt**

The main task of the Vice-Rector of Teaching and Studies is to guarantee that teaching and studies run smoothly by means of organizational and administrative management. This also includes quality management in teaching and studies. In addition, the Vice-Rector is responsible for the three basic programs in Human Medicine, Dentistry and Health Management and Nursing Science as well as the two doctoral programs (PhD program in Molecular Medicine and doctoral program in Medical Sciences) and the post-graduate field of university training courses, workshops, courses etc.

Besides this, she/he is also in charge of the strategic further development of the teaching and study offers. In particular, this requires cooperation with the Senate and the responsible Curricular Committees. Another task of the Vice-Rector of Teaching and Studies is to foster and further expand international cooperations and activities between students and teachers.

Since she/he is also responsible for the admission of students, she/he organizes and oversees the selection procedures for the programs in Human Medicine and Dentistry. In handling these tasks, the Vice-Rector receives assistance from the Organizational Unit for Teaching and Studies with its three divisions of "Studies and Examinations", "International Relations and Continuing Education" as well as "Organization and Teaching" and the two administrative departments of "Quality Management" and "Examination Methods". The Vice-Rector publicly represents the University in all aspects concerning studies and teaching, for example, with regard to the Styrian Hospitals Private Limited Company (KAGes) and the fora of "Teaching" and "International Matters" of Universities Austria.

Maria Kern
E-mail: maria.kern@medunigraz.at

Vice-Rector of Finance and Organizational Management

The main task of the Vice-rector of Finance and Organizational Management is to ensure the operational organization of the Medical University of Graz in financial, legal and infrastructural aspects.

MMag. Gerald Lackner

Operationally, the University Director is responsible for ensuring the running of the processes in the financial and administrative sections as well as in IT. In this context, mentioning among other things: monthly and quarterly reports in cost accounting, preparation of budgets and financial statements, cash control and ongoing inspections, evaluations in the context of worker protection and regular maintenance of technical installations and much more.

Finally, the University Director represents the Medical University of Graz in all commercial and infrastructure issues in its external relations, such as the Association of Universities and the forum "Budget and Resources" of the Austrian universities.

2.3.2 Bodies

The University Council

The University Council is responsible for control tasks and, in addition, should play a supervisory role, which had been the responsibility of the Federal Minister for Science and Research up to recently. The University Council is responsible, in particular, for approving the development plan, the organizational chart and the draft of the performance agreement between the university and the federal ministry as well as the rules of procedure of the Rector's Office. In cooperation with the Senate, the University Council is to define the future direction of the university and the strategies to be followed.

The term of members of the University Council is five years. Since 2008, the University Council is made up of 7 members.

Contact: Büro des Universitätsrats, Auenbruggerplatz 2/2, 8036 Graz,
Tel: +43/(0)316/385-72038
E-mail: unirat@medunigraz.at

The Senate

The Senate is the management body that is constituted according to the principle of the codetermination of university members. The Senate is responsible for the following tasks: enacting and amending statutes upon the proposal of the Rector's Office; enacting the curricula for degree study programs and university training courses; determining academic degrees and titles for graduates of university training courses; making decisions of the second instance on student matters; determining the categories from which the students may have a say in how their tuition fees are spent; enacting guidelines for the activity of collegial bodies; and establishing a Working Group on Equal Opportunities.

The term of members is 3 years. The members of the Senate are elected by the staff and students of the Medical University every 3 years.

Contact: Büro des Senats, Auenbruggerplatz 2/2, 8036 Graz
Tel: +43/(0)316/385-72037
E-mail: senat@medunigraz.at
Homepage: <http://www.medunigraz.at/senat/>

The Rector of Studies

The Rector of Studies is the legally required body of the first instance for decisions on study law. The Rector of Studies is responsible among other things for the following tasks: applications for admission to an individual (diploma) study program; issuing of diploma and doctoral viva voce certificates; accreditation of examinations; acceptance of diploma theses and dissertations; accreditation of foreign degrees (nostrification); diploma theses, and dissertations:

Acceptance of the topic named, appointment of members of the university in an advisory role; awarding of merit scholarships and research grants, awarding academic degrees to graduates of degree study programs, and much more.

The term is 2 years and the Rector of Studies is elected by the members of the Senate.

Tel: +43/(0)316/380-4009
E-mail: studienrektor@medunigraz.at
Homepage: <http://www.medunigraz.at/studienrektor/>

The Arbitration Committee

According to the legal regulations, the Arbitration Committee is responsible for the following tasks:

1. intermediation in disputes between members of the university as well as
2. the decision on grievances of the Working Group on Equal Opportunities

The term of the Arbitration Committee is 2 years. The committee is comprised of 6 members, and each third of which is nominated by the University Council, the Senate and the Working Group on Equal Opportunities.

Contact: Schiedskommission der Medizinischen Universität Graz
Auenbruggerplatz 2/IV (fourth floor), 8036 Graz
Tel: +43/(0)316/385-72024
E-mail: schiedskommission@medunigraz.at

The Ethics Committee

The Ethics Committee is responsible, among other things, for the testing of medication. It assesses clinical tests of medication and medical products, the application of the latest medical methods, and the medical research applied to humans in terms of their ethical acceptability taking all of the relevant laws, guidelines, and rules and regulations into account.

The Ethics Committee of the Medical University is responsible for the LKH-Univ.-Klinikum Graz as well as all the other hospitals of the Province of Styria.

The term is 3 years. The members of the Ethics Committee are delegated by the Senate.

Contact: Büro der Ethikkommission, Auenbruggerplatz 2/III
(third floor of the entrance center of the LKH-Univ.-Klinikum), 8036 Graz

E-mail: ethikkommission@medunigraz.at
Homepage: <http://www.medunigraz.at/ethikkommission/Graz/index.htm>

The Working Group on Equal Opportunities (AKGL)

The task of the Working Group on Equal Opportunities (AKGL) is to work against discrimination on the basis of sex and to advice and support members and bodies of the university on questions of equal opportunity for women and men as well as the advancement of women. Moreover, the Working Group is responsible for equal treatment with regard to ethnic descent, religion or world view, age or sexual orientation.

The members of the Working Group are not bound by any directives or agreements in the fulfillment of their duties, and treat every matter brought before the Working Group in strict confidence.

According to the statutes of the Medical University of Graz, the term of the Working Group is 3 years. Groups represented in the Senate, i.e. professors, scientific employees, general university staff and students, are entitled to the right to delegate members to the Working Group.

Tel: +43/(0)316/385-72048
E-mail: akgl-buero@medunigraz.at
Homepage: <http://www.medunigraz.at/akgl/>

The Employees' Council for Academic Staff (BR I)

The Employees' Council is a service and information centre for academic university staff. The term is 4 years. The members of the Employees' Council are elected by the academic staff of the Medical University.

Contact: Büro des Betriebsrates I, Auenbruggerplatz 35² ("church container"), 8036 Graz;
Tel: +43/(0)316/385-72081
E-mail: betriebsrat-wiss@medunigraz.at
Homepage: <http://www.medunigraz.at/betriebsratwiss/>

The Employees' Council for General Staff (BR II)

The Employees' Council is a service and information centre for general university staff. It represents employees as well as civil servants in the area of general university staff.

According to the Austrian Labour Constitution Act, the Employees' Council is appointed to look after and promote the economic, health, social and cultural tasks of employees at work.

The Employees' Council is also responsible for creating welfare institutions for employees. Another important task is monitoring laws as they concern employees.

The term is 4 years. The members of the Employees' Council are elected by the non-academic staff.

2.3.3 Maps

At present, the Medical University of Graz is spread out over three locations:

1. The campus of the University of Graz: Preclinic and main building of the university
2. LKH-Univ.-Klinikum Graz
3. Wartingergasse (near the Preclinic): organizational unit for the central infrastructure

You can find the maps on the homepage <http://www.medunigraz.at/orientierung/>. The locations are to be centralized into one overall campus by 2018.

Location 1: Preclinic

Location 3: Wartingergasse

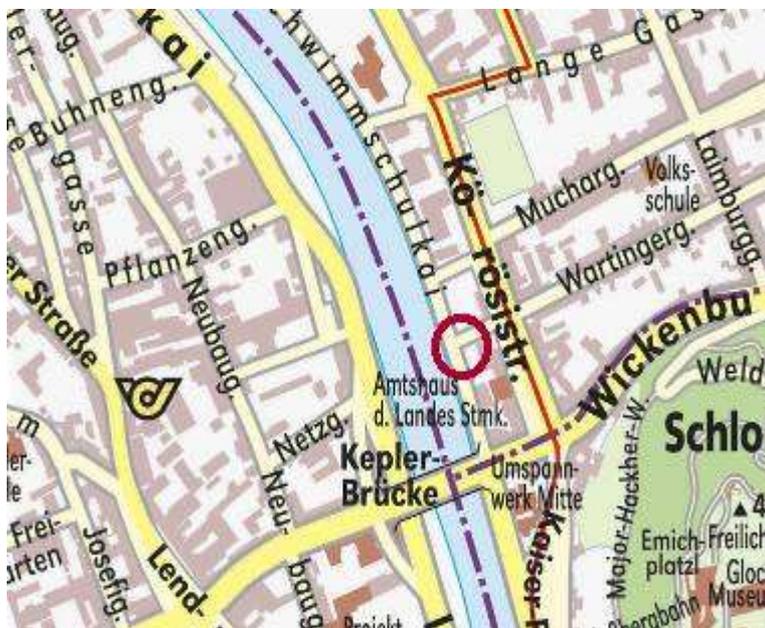

Wartingergasse 43: The following offices are located on the 10th, 11th, 12th and 13th floors:

Personnel Administration

Vice-Rector of Financial Management and Organization, Legal Department

Risk Management, Controlling, Financial Accounting Department

Internal Auditing, Purchasing, Organizational Development Administrative Department

3. Organizational Information

3.1 Web Service

MEDonline is the central database solution of the Medical University of Graz. It serves the purpose of the exchange of data of a wide variety of applications within research and teaching. More than 8,500 e-mail accounts are administered and serviced here.

Since the launch of MEDonline, the scope of services has been continually broadened:

- Newsletter
- Room book
- Internal continuing education
- Forms etc.

Moreover, the IT service line (Tel: +43/(0)316/380-4444) is available to you for enquiries.

3.2 Restaurants and Cafés

At the LKH-Univ.-Klinikum there are the following restaurants and cafés: Bäckerei Auer bakery, Café Fusio, Cafe Leonhard, Café/Restaurant Pastini, 3 Goldene Kugeln, and Schanzlwirt.

On the campus of the University of Graz and in the surrounding area there are numerous restaurants with reasonable lunch specials:

Universitätsplatz 3: Café MoccaUni

Heinrichstraße: Pizzeria Einstein, 3 Goldene Kugeln, Bierbaron

Harrachgasse: China Restaurant "MOND", Pizzeria Galliano, Preclinic buffet/cafeteria

Universitätsplatz: Café/Restaurant Unicafe, RESOWI cafeteria

Zinzendorfsgasse: Café/Pub Posaune, Propeller, Mosshammer

Elisabethstraße: Restaurant Laufke, Momiji (Japanese)

Sonnenfelsplatz: Uni Graz cafeteria

In the vicinity of Wartingergasse there are the following restaurants:

Korösisstraße: Restaurant Luttenberger, Korösistüberl

Kaiser-Franz-Josef-Kai: Taj Mahal

Sackstraße: Alte Münze, Midori

3.3 Places to Shop and Institutions

At the LKH-Univ.-Klinikum there are numerous places to shop and institutions such as the Apotheke St. Leonhard (pharmacy), Billa (supermarket), Bipa (drugstore); Blumenquelle, Winkler Blumen, St. Leonhard Blumen Rauch, Holland Blumenmarkt (flower shops); Fahrschule Start (driving school), Friseur Mayer (hairdresser's), Landes Hypo-Bank Steiermark, Palmers (lingerie), post office, Optik Schrei (optician's), Raiffeisenbank, Reisbüro Gruber (travel agency), Sanitätshaus ORTHOaktiv (medical supplies shop) etc...

In the vicinity of the campus of the University of Graz there are a few places to shop such as Nah & Frisch (grocer's), Café Sorger, Bank Austria, Raiffeisenbank, Sparkasse, pharmacies, Bipa (drugstore) etc...

4. Communication

Regardless of whether the communication is verbal or in writing, the staff of the Medical University of Graz should use gender-appropriate language.

4.1 Corporate Design

Corporate design conveys corporate identity by means of a consistent visual appearance.

- Name

The Medizinische Universität Graz is primarily to be referred to by its full name. The short version is Med Uni Graz. The English version is Medical University of Graz. There is no short version in English.

- Logo

The logo of the Medical University of Graz is a word/image trademark and comprises a circular symbol with a portrait of Leopold von Auenbrugger and the Styrian panther, which is holding an Aesculapian staff in its paws. The quotation "Salus Ægroti Suprema Lex" – "Let the well-being of the sick be the supreme law" runs along the edge of the circular symbol. In addition to the symbol, there are bands in two shades of green and the name Medizinische Universität Graz is highlighted.

- Font

Our standard font is "Syntax LT Std". However, "Arial" can also be used as an alternative, especially with regard to compatibility problems with other external computers.

Leopold von Auenbrugger (* 19 November 1722 in Graz; † 18 May 1809 in Vienna)

(Source: Wikipedia)

Leopold von Auenbrugger was an important physician and is regarded as the founder of the percussion diagnostic technique. He initially studied in Graz, and then studied medicine in Vienna, where he started to work as a physician in the *Spanish Hospital* in 1751 after receiving his degree. During this time he noticed the differences in sound when one tapped on different spots of the surface of the chest wall. He investigated this phenomenon and published a paper called *Inventum novum ex percussione thoracis humani ut signo abstrusos interni pectoris morbos detegendi* (New discovery by means of striking the human chest as an indication to find hidden chest diseases) in 1761.

Due to his discovery, Leopold von Auenbrugger, together with René Théophile Hyacinthe Laënnec (1781-1826), the inventor of the stethoscope, is considered to be the pioneer of physical diagnosis. Percussion and auscultation are basic clinical diagnostic methods of medicine, and it is almost impossible today to imagine practicing medicine without them. (In medicine, auscultation, (from Latin auscultare – to listen or eavesdrop (intently)) means listening to the body, most often by means of a stethoscope). The grounds of the Medical University Hospital of Graz were named *Auenbruggerplatz* in honor of him.

4.2 Marketing and Communication

Newsletter of the Medical University of Graz

The legal department publishes the newsletter of the Medical University on every 1st and 3rd Wednesday of the month. You can find the newsletter on the official bulletin board of the Preclinic and on the homepage at: <http://www.medunigraz.at/services/mitteilungsblatt.html>.

All of the basic policy documents (e.g. statutes, organizational chart and development plan, as well as regulations, guidelines and rules of procedure), performance agreements, authorities, management positions, balance sheets, use of tuition fees, curricula, election results, job advertisements and other announcements of general interest are made public in this way.

NEWS and NEWS Flash

Regular communication with all the employees of the Medical University takes place by means of the NEWS staff newspaper and NEWS Flash. NEWS is published every 2 months and contains reports from all the different fields of the Medical University. You can find the latest edition at <http://www.medunigraz.at/news/>.

NEWS Flash is a weekly newsletter, which contains an overview of events and information on current funding opportunities besides important, general information. You can find details on this on the Web at <http://www.medunigraz.at/newsflash>.

MEDITIO – The news magazine of the Medical University of Graz

Meditio, the news magazine of the Medical University, is published quarterly and provides information on what is new in the fields of research, university studies and patient care. Meditio aims at reporting specifically about the achievements of the Medical University. There are free copies available at the Preclinic and in the library in the ZMF (Center for Medical Research). Staff and alumni receive the Meditio by mail. Meditio is published by the External Communication department of the Rector's Office.

Press Information

You can find the latest information on the most important areas of university studies, teaching and patient care on the homepage (welcome page) under "Aktuelles" (current events). Press information is listed at <http://www.medunigraz.at/presse/>.

Contact: Büro des Rektors, Stabstelle Marketing und Kommunikation, MMag.^a Sylvia Trabi

E-mail: sylvia.trabi@medunigraz.at

Calendar of Events

You can find information on congresses & conferences on the homepage at: <http://www.medunigraz.at/veranstaltungen/> and on events from the latest NEWS flash.

Events

The Medical University of Graz offers a series of events for a wide variety of target groups. For instance, there has been a KinderUni Graz (children's university) since 2004 (together with 4 other Styrian universities and the FH Joanneum University of Applied Sciences) with a wide program the whole year round. Info events for students in their last year of secondary school (open house day), students and recent graduates or general info events for the interested public (the URANIA lecture series "Forschung hautnah" (research up close) are organized by the External Communication department in order to ensure that a standard line and a consistent appearance are present in the area of events, too.

Events (extract)

- Inaugural lectures; Awarding of Golden Diplomas; Open house day
- URANIA lecture series – Medical University of Graz
- KinderUni – lecture series and workshop days, Alumni events
