

CBmed is a center for biomarker research in medicine with headquarter in Graz and research activities also in Vienna. It links excellent research infrastructure, scientific expertise, medical knowledge, national and international industry partners for systematic medical biomarker research. To strengthen our team in Graz, we are seeking to recruit an ambitious, committed

Immunology Specialist with Experience in Microbiomics (f/m)

Tasks:

- Evaluate the effect of probiotics on disease activity, T cell polarization, immune cell signalling, and intestinal inflammation in a randomized controlled trial in psoriatic arthritis
- Integrate microbiomic data sets with these data
- Work closely with academic clinicians, study nurses, laboratories, and bioinformatic team
- Provide analytical insights for decision-making and discussion of scientific findings
- Dissemination of scientific results (publications, patents, project reports, conference talks)

Skills and Abilities:

- PhD in Biology, Biochemistry or equivalent with immunology specialization
- Experience and understanding of clinical study design and execution
- Experience in T cell immunology including flow cytometry, cell culture, and analysis of cytokine signalling
- Knowledge on microbiome analysis, network analysis, and large data statistics
- Advanced spoken and written English communication skills
- Excellent organizational and problem-solving skills
- Openness to work in an international team

You will have the opportunity to work in an international connected company, within a young, dynamic and international team.

We offer an unlimited contract with a minimum annual salary from € 24 850 gross based on 18 hours/week. Additionally, 2 hours/week are planned at the Medical University of Graz. Overpayment is possible, depending on qualifications and work experience.

Start date **01.05.2021 or earlier.**
